PROJECTS

Mr.Mobile

Ecommerce Website

A ecommerce website project on PHP. The main goal of the project is to create a fully functional online store particularly for mobile phones, where users can search and purchase products.

The modules used are the User authentication and authorization, Product management system, Shopping cart and the Payment.

"The main feature added is the integration of PHP mailer for email OTP verification during user registration process. One of the Unique feature that sets my ecommerce website apart from other sites, is the integration of Tawk, a powerful live chat software, to enhance the customer support experience."

The Tools Used:

- HTML
- CSS
- JAVASCRIPT
- BOOTSTRAP
- PHP
- MYSQL

Portfolio

Personal Web Page

- Designed and developed a personal portfolio webpage using frontend technologies, highlighting my creative abilities and technical skills.
- Utilized HTML, CSS, and JavaScript to create an aesthetically appealing and user-friendly webpage layout.
- Implemented responsive design principles to ensure optimal viewing experience across different devices and screen sizes.
- Showcased my projects, skills, and accomplishments in a visually compelling manner, utilizing effective content organization and navigation.
- Received positive feedback from peers and professionals for the overall design and functionality of the personal portfolio webpage.
